

# Action Taken Report (2018-19)

1. Most of the deliberations in the meetings are of the nature of 'sharing', 'training' 'consultation', 'seeking suggestions' and 'evolving' in nature. All were done.
2. As an educational institution we believe in deeper consultation, taking action and revising some of the decisions because they could not be implemented in the way originally planned due to logistical impediments. However all these are transparent and everything done for the betterment of all stakeholders and the institution.
